DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Species 1: reversible between said dieplate and said substrate; irreversible connection between said dieplate and said substrate (claim 2).
- Species 2: mechanic force, magnetic force, removable adhesion (claim 2).
- Species 3: hydrophilic material layer and layer of water absorbing material; hydrophobic material layer; leading ditch, tough, strip (claims 5, 15, 16).
- Species 4: physical action of swelling and dissolving; physical action of ultrasonic wave; mechanic action (claim 8).
- Species 5: two or more rows; only one row (claim 10).
- Species 6: hydrophilic inorganic material; hydrophilic organic material; natural macromolecular material and its derivatives (claim 16).

Claims 1, 4, 6-7, 9, 11-14, and 17-20 are generic.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point

Art Unit: 1634

out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert T. Crow whose telephone number is (571) 272-1113. The examiner can normally be reached on Monday through Friday from 8:00 am to 4:30 pm.
